 Manual Codes: T01-C02B1(In cooperation with display) , U21-B02C1 (Capacitive/inductive/resistive not requiring displacement of switch element) , W02-J03A4(User interface i.e. control input, displays)

Derwent Abstract

DERWENT RECORD

(JP228128A) Novelty - The projections (7,8) provided on the surface of a console panel (4) slidably contacts bottom end of touch panel display (3). Dial key (5) and cursor key (6) provided in console panel are distributed in a position lower than projections. The angle and position of touch panel display is fixed, when bottom end of display contact the projections.

Use - In communication terminal equipment e.g. facsimile provided with touch panel display.

Advantage - Since keys in console panel are provided in a position lower than projections, contact of touch panel display and the keys are prevented and installation space is made small depending on necessity. Hence failure of keys are also prevented.
